

# LM150KIQP Photoelectric Sensor – Laser Sensor, Diffuse Mode (Triangulation)

## Features

LM150KIQP Type ID no. 3803940 Optical data Proximity switch Function Operating mode Triangulation Light type Red Wavelength 655 nm Laser class <u></u> 2 Optical resolution 0.004 mm Repeatability 0.002 mm 50...150 mm Range Ambient light immunity 10000 lux Electrical data Operating voltage 10...30 VDC No-load current ≤ 62 mA Short-circuit protection yes Reverse polarity protection yes Communication protocol IO-Link Output function NO contact, PNP/NPN, analog output Output 2 Analog current 4...20 mA Current output ≤ 2100 ms Readiness delay < 0.5 ms Response time typical IO-Link V 1.1 **IO-Link specification** 

Class A

IO-Link port type

Stainless steel housing

- Protection class IP67
- Connection via 300 mm cable with connector, M12 × 1, 5-pin
- Laser class 2
- Visible red, 655 nm
- Analog output accuracy: 0,004 mm
- ■IO-Link accuracy: 0.2 mm
- Range: 50...150 mm
- Operating voltage: 10...30 VDC
- Push/pull switching output or IO-Link
- Analog output 4...20 mA

# Wiring diagram

# Functional principle

The LM laser triangulation sensor is designed to take very precise measurements at short distances. It features a push/pull switching output as well as an analog output. IO-Link communication is supported.

In addition to the indicators on the housing, the optional RSD display and adjustment tool allows you to view the current measured range or the value of the output analog signal on an LCD screen.

Versions with current output are already available. The sensor is connected to the M12 male connector via the cable.

## Accessories

SMBLML1

3805826 Mounting bracket for mounting LM proximity sensors, right-angled, stainless steel, dimensions WHD: 37x44x20 mm A stainless steel housing with IP67 protection rating completes the package for this compact yet powerful sensor.
