Mounting instructions/Description

Technical diagrams illustrating mounting configurations for the sensor. The top left shows a side view of a sensor mounted on a plate with dimension T. The middle left shows two sensors mounted on a plate with dimension G. The bottom left shows two sensors mounted on a plate with dimensions N, S, D, and W.

Technical diagrams illustrating mounting configurations for the sensor. The top right shows a front view of a sensor mounted on a plate. The bottom right shows a side view of a sensor mounted on a plate with dimension X.

Distance D	72 mm
Distance W	3 x Sn
Distance T	3 x B
Distance S	1.5 x B
Distance G	6 x Sn
Distance N	2 x Sn
Diameter active area B	Ø 18 mm

All non-flush mountable uprox®+ threaded barrel sensors can be screwed to the upper edge of the barrel. In this mounting position, the sensor operates safely with a 20 % reduced switching distance.

When installed in an aperture plate, a distance of X = 70 mm must be observed.
