

# PT6R-2008-I2-H1143/X

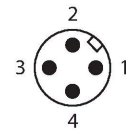

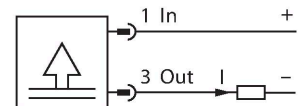

## Pressure Transmitter – With Current Output (2-Wire)

### Features

- Fully welded metal measuring cell
- Pressure range 0...6 bar rel.
- Pressure peak orifice
- 7...33 VDC
- Analog output 4...20 mA
- Process connection G1/2" male thread, back sealing and manometer (combi)
- Connector device, M12 × 1

### Wiring diagram

### Functional principle

The pressure sensors in the PT...-2000 product series operate with a fully welded metal measuring cell in various pressure ranges of up to -1...1000 bar in 2-, 3- or even 4-wire technology. Depending on the sensor variant, the processed signal is available as an analog output signal (4...20 mA, 0...10 V, 0...5 V, 1...6 V, ratiometric) or as a digital IO-Link process parameter. The IO-Link sensor variants also have two independently configurable switching outputs. In addition to the standard variants, there are special sensors for uses such as ATEX areas or for oxygen applications. A wide range of process connections and electrical connections offer a high degree of flexibility in a wide range of applications.
